

Course Syllabus

[Jump to Today](#)

MAT 275: Modern Differential Equations (2026 Summer A)

Welcome to MAT 275! Here's how to get started and stay on track this session:

Lecture Videos & Notes

Video lectures and written notes for each section are posted under the **Modules** tab on the left. You can also access them directly here: [Lecture Videos & Notes](#)

(<https://canvas.asu.edu/courses/259803/modules/2924349>)

Office Hours by Appointment

Need help or have questions? Office hours are available **by request via Zoom**.

Connect here: [Dr. Cole's Zoom Office](#)  (<https://asu.zoom.us/j/87672453730!%C2%A0>)

Homework Assignments on Edfinity

All homework will be completed on Edfinity.

Use the **Edfinity** link in the left-hand course menu to get started.

MATLAB for Lab Assignments

For lab assignments, you'll need MATLAB. If you are installing it on your personal computer, **be sure to include the Simulink package**. During installation, you must **manually check the box** for Simulink during the "Products" step (see image below for reference).

Computer Lab Assignments (MATLAB)

Please note: There are **no separate computer lab classes or sessions**. All computer lab assignments will be completed **independently on your own time**. However, reach out and I would be happy to meet with you independently.

No prior experience with MATLAB is expected — you'll learn as you go!

<http://myapps.asu.edu> (<http://myapps.asu.edu>)

Image reminding students to click Simulink

Where to Find the Course Summary

To see all assignment due dates and course events in one place:

👉 **Scroll down to the bottom of this page.**

You'll find the **Course Summary**, which includes a calendar-style list of everything due in this course. This updates automatically as new assignments or deadlines are added.

◆ **Tip:** If you'd like to jump directly to today's dates and deadlines, simply click the **"Jump to Today"** button at the top of the page.

Let me know if you have trouble finding it!

MAT 275: Modern Differential Equations Summer 2026 A Syllabus

Course and Faculty Information

□

Instructor: Sandra Cole, PhD (Dr. C)

Contact Information: sandracole@asu.edu

Office: West Valley SANDS 227B

Office Hours

- Office hours available by appointment <https://asu.zoom.us/j/87672453730> 
(<https://asu.zoom.us/j/87672453730>) Requires authentication to join. E-mail me with suggested dates/times that work for you, and I will try to make it work!

Note: Although I will do my best to respond to e-mails promptly, I cannot guarantee with certainty that I will be able to do so outside of working hours (M - F 8a - 5p). However, my goal is to always respond within two working days!

Course Description

Introduces differential equations, theoretical and practical solution techniques as well as applications. Problem solving using MATLAB.

Credits

3

Prerequisites

MAT 266 or 271 with a C or better; Credit is allowed for only MAT 274 or 275 OR Visiting University Student.

Course Expectations

This course is an iCourse. It is not a self-paced, open-entry open-exit course, but an alternative to attending classes on campus. This is a university level course with a substantial workload so expect to spend **30+ hours** per week learning the material and completing course work. A typical in person student spends 6 hours and 20 minutes a week in the classroom and is expected to spend at least 2 hours a week for each hour spent in class. Online students are expected to spend an equivalent amount of time watching videos, reading the text and completing the course work.

Course Learning Objectives – what you will learn!

At the completion of this course, students will be able to:

1. Modeling with differential equations in real-life areas
2. Intro to ODEs, the concept of linearity, order, homogeneity, etc.; IVPs and the existence and uniqueness theorem for 1st-order IVPs.
3. First-order ODEs: solution of separable equations; solution of linear equations.
4. Approximation of solutions: Euler and Improved Euler methods.
5. Higher-order ODEs and IVPs; solution of linear ODEs with constant coefficients.
6. Transformation of higher-order ODEs to systems of first-order ODEs.
7. Laplace transforms and their inverses, and solution of linear IVPs using them.
8. Solution of linear, homogeneous, first-order systems with constant coefficients using matrices.

Course Access

Your ASU courses can be accessed by both [my.asu.edu \(http://my.asu.edu/\)](http://my.asu.edu/) and [asu.instructure.comLinks to an external site. \(https://canvas.asu.edu/%22%20/t%20%22_blank\)](https://canvas.asu.edu/%22%20/t%20%22_blank); bookmark both in the event that one site is down.

Computer Requirements

This is a fully online course; therefore, it requires a computer with internet access and the following technologies:

- Web browsers ([ChromeLinks to an external site. ↗ \(https://www.google.com/chrome%22%20/t%20%22_blank\)](https://www.google.com/chrome%22%20/t%20%22_blank), [Mozilla FirefoxLinks to an external site. ↗ \(http://www.mozilla.org/en-US/firefox/new\)](http://www.mozilla.org/en-US/firefox/new), or [SafariLinks to an external site. ↗ \(http://www.apple.com/safari\)](http://www.apple.com/safari).)
- [Adobe Acrobat ReaderLinks to an external site. ↗ \(http://get.adobe.com/reader\)](http://get.adobe.com/reader) (free)
- Webcam, microphone, headset/earbuds, and speaker

- Microsoft Office (**Microsoft 365 is free** (<https://myapps.asu.edu/app/microsoft-office-2016-home-usage>) for all currently-enrolled ASU students)
- Reliable broadband internet connection (DSL or cable) to stream videos.

Note: A smartphone, iPad, Chromebook, etc. will not be sufficient for completing your work in ASU Online courses. While you will be able to access course content with mobile devices, you must use a computer for all assignments, quizzes, and virtual labs.

Help

For technical support, use the Help icon in the black global navigation menu in your Canvas course or call the ASU Help Desk at 1+(855) 278-5080. Representatives are available to assist you 24 hours a day, 7 days a week.

Student Success

To be successful:

- check the course daily
- read announcements
- read and respond to course email messages as needed
- complete assignments by the due dates specified
- communicate regularly with your instructor and peers
- create a study and/or assignment schedule to stay on track
- access **ASU Online Student Resources** (<https://goto.asuonline.asu.edu/success/online-resources.html>).

Digital Literacy

Below are some of the skills you'll need to utilize to be successful in this ASU Online courses:

- Using Canvas LMS - For additional help on this, visit the **Canvas Resources for Students** (<https://lms.asu.edu/resources-students>) or the **Student Canvas Guide** [Links to an external site.](https://community.canvaslms.com/t5/Student-Guide/tkb-p/student)  (<https://community.canvaslms.com/t5/Student-Guide/tkb-p/student>) Be sure to bookmark these resources for future reference!
- Using email with attachments
- Creating and submitting word files
- Copying and pasting
- Downloading and installing software
- Using presentation and graphics programs

The ASU Library has a number of tutorials available to support students in expanding their digital literacy skills: **ASU Library tutorials** (<https://lib.asu.edu/tutorials>).

Course Communications

This course is on **Canvas** and uses **Edfinity** for homework assignments. Course materials will be posted on Canvas. Links to Edfinity may be accessed through Canvas. Due dates will be posted in Canvas and Edfinity.

Edfinity

We will be using Edfinity for this course, integrated with Canvas. This is a required material for this course.

For the required material, you will be charged \$46 if you purchase directly from Edfinity. You must access Edfinity directly from Canvas and NOT through Edfinity.com for everything to work properly. If you would like to use financial aid and purchase through the bookstore, the pricing is \$48 and the link is this one: <https://www.bkstr.com/arizonastatestore/product/edfinity-with-office-hours-610030-1> 
[\(https://urldefense.com/v3/_https://www.bkstr.com/arizonastatestore/product/edfinity-with-office-hours-610030-1_!!IKRxdwAv5BmarQ!b3Q-3qvvJKo8hBJ_EKrhthpSkaBvVOY8XagA5T82gFe3NqEtQFPLHzPtGMh_qFr3ehvhifhtb6IVVPgLvqQrZi_5\\$\)](https://urldefense.com/v3/_https://www.bkstr.com/arizonastatestore/product/edfinity-with-office-hours-610030-1_!!IKRxdwAv5BmarQ!b3Q-3qvvJKo8hBJ_EKrhthpSkaBvVOY8XagA5T82gFe3NqEtQFPLHzPtGMh_qFr3ehvhifhtb6IVVPgLvqQrZi_5$)

To enroll in our Edfinity section, please follow the steps below:

1. Important: Upgrade to the latest version of Google Chrome or Firefox on a Windows/Mac computer. Other browsers like Safari and devices like Chromebooks can cause issues when you access Edfinity via Canvas.
2. If you already have created an account on Edfinity, make sure you are signed out of edfinity.com.
3. Log into Canvas.
4. Click on the Edfinity link in the Canvas navigation menu to launch.
5. You will be prompted to pay and enroll in our course.
6. Start working on your assignments!

Textbook

The required textbook for this course is **A Course in Differential Equations with Boundary-Value Problems**, 2nd Ed, by Wirkus, Swift, and Szypowski.

Graphing Calculator

A graphing calculator is required for this course. We will be using the TI-83 Plus or TI- 84 Plus. **Calculators with QWERTY keyboards or those that do symbolic algebra, such as the Casio FX2, Casio 9970Gs, TI-89, or TI-92, TI-nspire CAS *cannot* be used during an exam.**

Webcam & Microphone

Online exam proctoring, Honorlock, is required for the exams. This requires a computer with a webcam and microphone. Working webcam & microphone on your laptop or desktop are fine. If you don't have that, you will need an external plug-in webcam & microphone.

Online Proctoring (Honorlock) Information

This course uses **online proctoring that requires a laptop or desktop. Tablets, iPads, and Mobile Devices are not supported. And you need the latest version of Chrome. It is the student's responsibility to ensure you have a device that works with Honorlock for proctored tests from the beginning of the semester.** Once the proctoring is launched, you will be required to take a picture of yourself, show your photo ID (with name and photo clearly shown) and complete a scan of your desk, chair and room. Honorlock will record your exam session through your webcam, microphone and will record your screen as well. Honorlock also has an integrity algorithm that can detect search-engine use, so please do not attempt to search for answers, even if it's on a secondary device.

- **You can find the detailed system requirements at the following link:** Please scroll down after accessing the following link to see the minimum requirements of your computer to use Honorlock: <https://honorlock.com/support>  [\(https://honorlock.com/support\)](https://honorlock.com/support) You must verify that you have access to a computer system that meets the requirement for Honorlock.
- **GOOD INTERNET CONNECTION, WEBCAM AND MICROPHONE ARE REQUIRED TO TAKE THE EXAMS.**
- For each exam you are allowed:
 - Calculator from the approved list on the syllabus.
 - Blank paper for scratch
 - There will be NO browsing on the web.

Online Proctoring & Exam Setup Requirements

All exams in this course are administered using **Honorlock**. You are required to use Honorlock and follow all proctoring guidelines.

Important:

You must set up your webcam so that your **full workspace is clearly visible at all times**, including your **face, hands, arms, and scratch work area**. This typically requires the use of an **external webcam**, as built-in webcams often do not provide a sufficient view.

Failure to meet these requirements may result in your exam being flagged and referred for academic integrity review.

Students are responsible for ensuring that:

- Their camera angle is correct before starting the exam
- Their entire workspace remains visible throughout the exam
- Their equipment is functioning properly

Detailed setup instructions and examples can be found in Canvas:

- **“Webcam Setup: Online Proctoring for Course Exams”**
- **“Honorlock – Important for Exams”**

These resources are located in the **“LET’S GET STARTED!!!” module** and must be reviewed prior to taking any exam.

Official Photo

According to ASU policy, all online students are required to have an official photo on file with the University. If you do not have an official photo on file, please click on this link to upload a photo:

<https://webapp4.asu.edu/cardservices> (<https://webapp4.asu.edu/cardservices>)

Grading

Homework (19%) + Labs (15%) + Practice Exam (1%) + Exams (40%)

+ Final Exam (25%) = Total (100%)

Grading Rubric

Description	Approximate %
Online homework	19
Computer Labs	15
Practice Exams	1
2 Exams (proctored)	40
Cumulative Final Exam (proctored)	25
Total	100%

This course will be graded on an A-E plus/minus scale.

Grading Scale

Letter Grade	Percent Range
A+	97 – 100%
A	93 – 96.99%
A-	90 – 92.99%
B+	87 – 89.99%
B	83 – 86.99%
B-	80 – 82.99%
C+	76 – 79.99%
C	70 – 75.99%
D	60 – 69.99%
E, EU or EN	Below 60%

You will receive a grade of E if you earn less than 60% or fail to complete the course by the established date or without the benefit of an official withdrawal.

E: Student participated and completed the course with an average below 60%

EN: Student never participated in the course and did not withdraw.

EU: Student participated in the course, but did not complete the course and did not withdraw.

For ASU's grading scale, policies, and definitions visit this website: [https://students.asu.edu/grades - grading_\(https://students.asu.edu/grades#grading_\)](https://students.asu.edu/grades-grading_(https://students.asu.edu/grades#grading_))

Grading Adjustments / Flexibility Policy

To provide flexibility, the lowest homework score and lowest MATLAB assignment score will be dropped. Additionally, if the final exam score is higher than a student's lowest midterm exam score, the final exam score will replace that one midterm exam score (either Exam 1 or Exam 2). These adjustments are applied automatically at the end of the course. No additional requests for grade adjustments or rounding will be considered.

NOTE: I do not round up, offer additional work/bonus opportunities, or alter grades in any way following posting of the final grade.

Course Schedule

Note: Course content and schedule may vary from this outline to meet the needs of a particular class.

Where to Find the Course Schedule

To see all assignment due dates and course events in one place:

Scroll down to the bottom of this page.

You'll find the **Course Summary**, which includes a calendar-style list of everything due in this course. This updates automatically as new assignments or deadlines are added.

◆ **Tip:** If you'd like to jump directly to today's dates and deadlines, simply click the **"Jump to Today"** button at the top of the page.

Submitting Assignments

All assignments, unless otherwise announced (e.g. Edfinity), **MUST** be submitted to the designated area of Canvas. **Do not submit an assignment via email.**

Assignment due dates follow Arizona Standard time. Click the following link to access the **Time Converter**  (<http://www.thetimezoneconverter.com/>) to ensure to account for the difference in Time Zones. Note: Arizona does not observe daylight savings time.

Assignment Descriptions

Homework

Students are expected to do all homework assignments. The assignments using Edfinity are due online. Due dates for HW assignments are in Edfinity and on Canvas. **Assignments are due at 11:59pm AZ**

time. *Late assignments will NOT be accepted.*

The lowest homework score will be dropped. This adjustment is applied at the end of the course before final grades are calculated.

Computer Lab Assignments

We will be learning MATLAB via 6 Computer Lab Assignments. These are in addition to the Edfinity homework. You don't need any prior knowledge of MATLAB. It can be accessed through <http://myapps.asu.edu/> (<http://myapps.asu.edu/>) from any computer with internet access. The assignment must be saved in one file in pdf format and submitted through Canvas. Additional instructions will be given on the assignments. **Late assignments will NOT be accepted.**

Note the following:

It is your responsibility to verify that the submitted file(s) uploaded properly, were the correct file(s), were submitted to the correct assignment, were submitted no later than the late deadline, and are showing up in the Canvas assignment window. Failure to do any of these things will result in a grade of 0 on the assignment. No submissions of files after the deadline will be accepted for a grade.

MATLAB Assignments must be in PDF format and must have both *inputs and outputs* displayed to receive credit. Each MATLAB homework assignment has its own template, provided within the assignment on Canvas. Students must download and complete the correct template, including all required inputs and outputs. The completed file must then be saved as a PDF and uploaded to Canvas by the assignment deadline. Submissions that do not use the correct template or format may receive reduced credit.

Technical difficulties do not warrant an extension. Labs are open well in advance to complete on time. Last minute requests due to technical issues will be denied.

The lowest MATLAB (computer lab) score will be dropped. This adjustment is applied at the end of the course before final grades are calculated.

Exams and Final Exam

All exams are administered through Honorlock. Students must follow all proctoring and workspace visibility requirements as outlined in the Online Proctoring section of the syllabus.

There will be 2 exams plus a comprehensive final exam. The Exam and Final Exam dates are listed on the course schedule. ***There will be no make-up exams*** given with the exception of last-minute medical emergency, where documentation will be required. **Exams will be taken online during fixed available dates using Honorlock. Please note that this is NOT a self-paced course.** Exam scores will NOT be dropped.

The exams **require a webcam & microphone and online proctoring using Honorlock.** You should go through the **Honorlock video and Honorlock Information included in the syllabus** and take the "Practice Using Honorlock" quiz in the beginning of the semester to ensure your computer/laptop has all

the requirements that are required for the use of Honorlock for online proctoring during the tests and to become familiar with the proctoring process.

Any student who accesses or has in sight a phone or any internet-capable device during an exam for any reason automatically receives a score of zero on the exam. All such devices must be turned off and put away and made inaccessible during the exam. Moreover, all internet-capable devices must be turned off and be made inaccessible during all exams. Anyone who accesses such a device during an exam for any reason will receive a score of 0 for that exam and possibly further disciplinary measures.

You may submit scratch work for the Exam for partial credit.

It is your responsibility to verify that the submitted file(s) uploaded properly, were the correct file(s), were submitted to the correct assignment, were submitted no later than the deadline, and are showing up in the Canvas assignment window. Failure to do any of these things will result in a grade of 0 on the assignment. No submissions of files after the deadline will be accepted for a grade.

For the partial scratch work to be considered; it must be uploaded to Canvas IMMEDIATELY following the exam. Scratch uploaded more than 10 minutes after Honorlock closes will NOT be accepted for partial credit.

Scratch work must be loaded as a single PDF. You will NOT be able to load multiple images. Therefore, during the practice exam, practice loading your images into a Word or google document and save as a single PDF file. You will only get 2 submission attempts so double check your document before you turn it in. One attempt is for scratch and the other for the formula sheet.

There will be two midterm exams and a comprehensive final exam.

If your final exam score is higher than your lowest midterm exam score, your final exam score will replace **one** midterm exam score (the lower of Exam 1 or Exam 2). This replacement will occur at most once. This adjustment is applied at the end of the course before final grades are calculated.

Extra credit

No individual requests for extra credit projects will be considered.

Late or Missed Assignments

Notify the instructor **BEFORE** an assignment is due if an urgent situation arises and you are unable to submit the assignment on time.

Follow the appropriate University policies to request an **[accommodation for religious practices](http://www.asu.edu/aad/manuals/acd/acd304-04.html)** (<http://www.asu.edu/aad/manuals/acd/acd304-04.html>) or to accommodate a missed assignment **[due to University-sanctioned activities](http://www.asu.edu/aad/manuals/acd/acd304-02.html)** (<http://www.asu.edu/aad/manuals/acd/acd304-02.html>).

Not all assignments qualify for late submissions. If an Edfinity assignment can be turned in post-due date, it is subject to a 20% drop in grade within a 2-day post-due date. If a textbook assignment or Computer Lab assignment can be turned in post-due date, it is subject to a 10% drop in grade per day for a 2-day post-due date. Extensions will not be granted and late work will not be accepted after the 2-day post-due date. Any assignments not turned in by the due date will be assigned a zero. Absolutely no work will be accepted after the last day of class.

I understand that technical issues do occur, but they do not excuse late/missing assignments. For help with course technology, contact the University Technology Office: **<https://tech.asu.edu/initiatives/ask-asu/support>** (<https://tech.asu.edu/initiatives/ask-asu/support>).

If you have extenuating circumstances such as severe illness or a death in your immediate family, please contact the Dean of Students Office (602) 543-8152 (UCB 301) with documentation of your emergency. The Dean will advise me of the appropriate accommodations.

Follow the appropriate University policies to request an accommodation for religious practices or to accommodate a missed assignment due to university-sanctioned activities.

Student Resources

- Tutoring: As an ASU student, FREE tutoring is available for you, on campus or online. Visit **<https://tutoring.asu.edu/student-services/tutoring>** (<https://tutoring.asu.edu/student-services/tutoring>).
- Visit the Student Success Center **<https://success.asu.edu/>** (<https://success.asu.edu/>).
- The **[ASU Experience Center](https://uto.asu.edu/experiencecenter)** (<https://uto.asu.edu/experiencecenter>) should be able to assist you with computer/technical issues during the course.
- An additional resource for assistance is your instructor's office hours.

Communicating With the Instructor

Community Forum

This course uses a discussion topic called "InScribe Community" for general questions and comments about the course. Prior to posting a question or comment, check the syllabus, announcements, and existing posts to ensure it's not redundant. You are encouraged to respond to the questions of your classmates.

Email questions of a personal nature to your instructor. You can expect a response within 72 hours.

Email

- ASU email is an **official means of communication** (<http://www.asu.edu/aad/manuals/ssm/ssm107-03.html>) among students, faculty, and staff. Students are expected to read and act upon email in a timely fashion. Students bear the responsibility of missed messages and should check their ASU-assigned email regularly.
- You must have an active ASU email account and access to the Internet. **All instructor correspondence will be sent to your ASU email account. Sending email to your instructor from a non-ASU email may cause a delay in response time as instructors cannot reply directly to such emails.**
- You may also use the Canvas Inbox feature to correspond or ask questions of a personal nature to your instructor.
- Include the class information (e.g., MAT 275 iCourse).

Communication Expectations (Netiquette)

Learning takes place best when a safe environment is established. Students enrolled in this course have a responsibility to support an environment that nurtures individual and group differences and encourages engaged, honest discussions. Doing so will effectively contribute to our own and others intellectual and personal growth and development. We welcome disagreements in the tolerant spirit of academic discourse, but please remember to be respectful of others' viewpoints, whether you agree with them or not. The following are some guidelines to consider when engaging in online discussion and discourse:

- **Be kind and polite.** Be mindful of your tone and do not make fun of another person for any reason.
- **Be respectful.** Being part of an academic community means being exposed to diverse perspectives and viewpoints. Be respectful in all situations and in your critiques. If you wouldn't say it face to face, don't say it online
- **Be wary of sarcasm.** In person, sarcastic comments can be funny and break up a tense situation. Online, it's hard to tell the difference between when someone is being sarcastic and when someone is genuinely being rude.
- **Avoid stereotyping.** Just because someone holds view X, and some people you know of who hold view X also hold view Y, doesn't mean that holding view X means holding view Y.
- **Use proper grammar and spelling.** Typos and basic spelling mistakes will happen, but if it's detracting from your message, it can be difficult to figure out what you mean. Also, you should avoid using all caps as this can imply shouting in the online environment.

Assessment

This course uses HonorLock technology for all exams. This technology is offered free to students and helps to ensure the academic integrity of this course. Students will need to have a camera, microphone and identification as well as a private space when taking exams-see computer requirements above. Students are expected to take all exams following the ASU academic integrity guidelines.

ASU Online Course Policies

View the **ASU Online Course Policies** (<https://asuonline-dev.asu.edu/qm-template/CanvasQM/qm-policies.html>)

Inclusive Environment

Throughout this course, you may be presented with ideas or perspectives that you are unfamiliar or uncomfortable with. We encourage you to critically examine these ideas and take risks by offering your own experiences and perspectives through civil discourse. In return, I will work to foster and create an environment where you feel supported in taking these risks.

When possible, human biases were addressed in the design of this course. If there are aspects of the design, instruction, and/or experiences within this course that result in barriers to your inclusion, please reach out to me with suggestions on how I can further improve this course for you or for others.

Syllabus Disclaimer

The syllabus is a statement of intent and serves as an implicit agreement between the instructor and the student. Every effort will be made to avoid changing the course schedule but the possibility exists that unforeseen events will make syllabus changes necessary. Remember to check your ASU email and the course site often.

ASU Academic Integrity

Academic honesty is expected of all students in all examinations, papers, laboratory work, academic transactions, and records. Students in this class must adhere to **ASU's academic integrity policy** (<https://provost.asu.edu/academic-integrity/policy>). Students are responsible for reviewing this policy and understanding each of the areas in which academic dishonesty can occur. All academic integrity violations will be reported to the New College Academic Integrity Office (AIO). The possible sanctions include but are not limited to appropriate grade penalties, course failure (indicated on the transcript as a grade of E), course failure due to academic dishonesty (indicated on the transcript as a grade of XE), loss of registration privileges, disqualification, and dismissal. The AIO maintains records of all violations and has access to academic integrity violations committed in all other ASU college/schools.

Indicate if AI is/is not permitted. Only **ONE** of the following sections should be retained.

Generative AI is Not Permitted

The use of AI tools and techniques is not permitted in this course. Use of generative AI in this course is considered a violation of **ASU's Academic Integrity Policy** (<https://provost.asu.edu/academic-integrity>) and will result in appropriate sanctions, which include a zero on the assignment, reporting to the New College of Interdisciplinary Arts and Sciences Academic Integrity Officer (AIO), and further as specified by the AIO.

Generative AI is Permitted, with Parameters

The use of AI tools and techniques on *specified* assignments (according to individual assignment descriptions) is permitted, provided that the following guidelines are followed:

- AI tools may augment the student's work, but should not be the sole basis for the assignment.
- The use of AI tools should be appropriately acknowledged and documented, with proper citations and references. For reference, see this website: [How to Cite ChatGPT in APA Format](https://apastyle.apa.org/blog/how-to-cite-chatgpt?_ga=2.148236919.1122939435.1684188676-778798571.1684188673)  (https://apastyle.apa.org/blog/how-to-cite-chatgpt?_ga=2.148236919.1122939435.1684188676-778798571.1684188673).
- The ethical and social implications of using AI should be considered when deciding to use AI tools in assignments.
- Students should not use AI tools to engage in academic dishonesty or plagiarism. Students should be familiar with [ASU's Academic Integrity Policy \(https://provost.asu.edu/academic-integrity\)](https://provost.asu.edu/academic-integrity) and should reach out to the instructor with any questions regarding use of generative AI on individual assignments. Additional information can be found on the [Office of the University Provost's Generative AI FAQ \(https://provost.asu.edu/generative-ai-faqs\)](https://provost.asu.edu/generative-ai-faqs) website.

ASU Student Code of Conduct

Students are expected to follow the [ASU Student Code of Conduct \(https://eoss.asu.edu/dos/srr/codeofconduct\)](https://eoss.asu.edu/dos/srr/codeofconduct), especially when communicating with peers, staff, and instructors. Violations of the student code of conduct may result in withdrawal from the class.

Academic Status Reports

This course incorporates an early alert reporting system called Academic Status Reports (ASRs) to give you helpful updates throughout the semester. An ASR will let you know if you are progressing well or if there are concerns related to your class performance. Concerns may be related to missing classes, missing assignments, or the quality of your work. ASR notifications will be sent to your ASU email address and are visible on My ASU in the My Classes box. The ASR may provide recommended actions, such as meeting with your instructor, TA, or academic advisor. If you receive an ASR, don't ignore it and keep calm (it might be good news).

Read the message, follow the suggested instructions, and don't delay. Information for making an appointment with your academic advisor can be found on My ASU in the Academic Support Team box. Students should view ASRs as confirmation of good work or use them as a catalyst to make changes, seek assistance, and improve in the course.

You can learn more about ASRs on the [Academic Status Report Resources page \(https://students.asu.edu/academic-status-report\)](https://students.asu.edu/academic-status-report).

Assessments

Please be aware that student scores on exams or other graded work may be used to assess program goals of degrees offered by the School of Mathematical and Natural Sciences.

Attendance/Absence Policies

In addition to the instructor's general policy on absences and missed work, excused absences and conditions for making up work include **Accommodation of Religious Practices** (<https://www.asu.edu/aad/manuals/acd/acd304-04.html>) and Missed Classes Due to University-Sanctioned Activities (ACD 304-02. Students must notify their instructors of these absences as early as possible in the semester.

Copyright Infringement

All course content and materials are copyrighted materials. Students may not share outside the class, upload to online websites not approved by the instructor, sell, or distribute course content or notes taken during the conduct of the course [see **Academic Affairs Manual policy 304-06: Commercial Note Taking Services** (<https://www.asu.edu/aad/manuals/acd/acd304-06.html>) and **Student Code of Conduct policy 5-308 F.14 Prohibited Conduct**  (<https://public.azregents.edu/Policy%20Manual/5-308-Student%20Code%20of%20Conduct.pdf>) (page 10) for more information]. This includes lectures, recorded lectures, and lectures administered and recorded using Zoom. Students must refrain from uploading to any course shell, discussion board, or website used by the course instructor or other course forum material that is not the student's original work unless the students first comply with all applicable copyright laws. Faculty members reserve the right to delete materials on the grounds of suspected copyright infringement.

Course/Instructor Evaluation

The course/instructor evaluation for this course will typically be conducted online 7-10 days before the last official day of classes of each semester or summer session. Your response(s) to the course/instructor is anonymous and will not be returned to your instructor until after grades have been submitted. The use of a course/instructor evaluation is an important process that allows our college to (1) help faculty improve their instruction, (2) help administrators evaluate instructional quality, (3) ensure high standards of teaching, and (4) ultimately improve instruction and student learning over time. Completing the evaluation is not required for you to pass this class and will not affect your grade, but your cooperation and participation in this process are critical. About two weeks before the class finishes, watch for an e-mail with "NCIAS Course/Instructor Evaluation" in the subject heading. The e-mail will be sent to your official ASU e-mail address.

Final Exam Make-up Policy

ASU's **Final Exam Schedule** (<https://students.asu.edu/final-exam-schedule>) will be strictly followed. Exceptions to the schedule and requests for make-up examinations can be granted only by the Associate Director of the School of Mathematical and Natural Sciences for one of the following reasons: 1) religious conflict; 2) the student has more than three exams scheduled on the same day; 3) two finals are scheduled to occur at the same time. Make-up exams will NOT be given for any of the following reasons: non-refundable airline tickets, vacation plans, work schedules, weddings, family reunions, or

other such activities. Students should consult the final exam schedule before making end-of-semester travel plans.

Incomplete

A mark of "I" (incomplete) is given by the instructor when you are otherwise doing acceptable work but are unable to complete the course because of illness or other conditions beyond your control. You are required to arrange with the instructor for the completion of the course requirements. The arrangement is recorded on the [Request for Grade of Incomplete form \(https://registrar.asu.edu/forms/incomplete-grade-request\)](https://registrar.asu.edu/forms/incomplete-grade-request). Do not re-register or pay fees to complete the course. The completion date is determined by the instructor but may not exceed one calendar year from the date the mark of "I" is recorded. When you complete the course, the instructor must submit an online grade change request. If you receive an "I" in an undergraduate course, your grade will be automatically changed to a failing grade "E" if you do not complete the course within one calendar year. If you receive an "I" in a graduate course (500-level or above) your "I" grade will become a permanent part of your transcript if you do not complete the course within one year, and you will have to re-register and pay fees to repeat the course for credit. Marks of "I" are changed to a grade of "E" (0.00) for purposes of evaluating graduation requirements for undergraduate students.

A signed [Request for Grade of Incomplete Form \(https://students.asu.edu/forms/incomplete-grade-request\)](https://students.asu.edu/forms/incomplete-grade-request) must be submitted by the student and approved by the student's instructor and the Associate Director of the School of Mathematical and Natural Sciences prior to the last day of classes. **A grade of incomplete will NOT be awarded unless there is documented evidence of extreme personal or immediate family hardship, and the student must have a passing grade at the time of the request.** Changes in work hours or other similar personal problems will not be approved as reasons for awarding incompletes. The Associate Director of the School of Mathematical and Natural Sciences must approve any incomplete grade requests.

Grade Grievances

Any student seeking to appeal a grade must follow the following steps. This process does not address academic integrity allegations or faculty misconduct. Student grade appeals must be processed in the regular semester immediately following the issuance of the grade in dispute (by commencement for Fall or Spring semesters), regardless of whether the student is enrolled at the University. There are two stages to the grievance process: the informal process and the formal process. Each process contains a series of steps that must be followed in order. The informal process, outlined below and facilitated by the School of Mathematical and Natural Sciences, must be followed prior to escalation to the formal process:

1. A one-on-one meeting must be scheduled with the instructor. During this meeting, a student must state the reason for questioning that the grade was not given properly/in good faith. The instructor must review the matter, explain the grading procedure, and explain how the grade was determined.

The student and the instructor must work toward resolution, and grade grievances should ideally be resolved at this level.

1. If the issue is unresolved, the student can appeal to the School of Math and Natural Sciences Grievances committee (MNSgrievances@asu.edu (<mailto:MNSgrievances@asu.edu>)). The student must provide a written rationale and evidence that the grade was not given appropriately as well as a summary of the instructor's response/the meeting with the instructor.
1. If MNS Grievances policy do not resolve the issue, the student can appeal to the Associate Director and Director of the School of Math and Natural Sciences.
1. If the issue is not resolved at the level of the School of Math and Natural Sciences, the student can confer with the Dean's Representative in the New College of Interdisciplinary Arts and Sciences (Executive Director of Academic Services and Strategic Initiatives) who will review the case and explain the formal process to the student.

Policy against Threatening Behavior

In the classroom and out, students are required to conduct themselves in a manner that promotes an environment that is safe and conducive to learning and conducting other university-related business. All incidents and allegations of violent or threatening conduct by an ASU student will be reported to the ASU Police Department (ASU PD) and the Office of the Dean of Students. Such incidents will be dealt with in accordance with the policies and procedures described in [Section 104-02 of the Student Services Manual](https://www.asu.edu/aad/manuals/ssm/ssm104-02.html) (<https://www.asu.edu/aad/manuals/ssm/ssm104-02.html>).

Potentially Offensive Content

If you find any of the content in your class offensive, please bring your concerns to the instructor immediately. If raising the issue with the instructor is problematic, these concerns should be brought to the attention of the Director and Associate Director of the School of Mathematical and Natural Sciences.

Reasonable Accommodations for Students with Disabilities

[Student Accessibility and Inclusive Learning Services \(SAILS\)](https://eoss.asu.edu/accessibility) (<https://eoss.asu.edu/accessibility>) provide information and services to students with any documented disability who are attending ASU. Individualized program strategies and recommendations are available for each student as well as current information regarding community resources. Students also may have access to specialized equipment and supportive services and should contact the instructor for accommodations necessary for course completion.

Respectful Communications

As a beacon for critical thought and the advancement of knowledge, ASU values dissenting opinions. Acknowledging that someone else's opinion matters as much as our own is the first step to creating a respectful dialogue. However, we must also distinguish between opinion, fact, and policy. Valuing and respecting those opinions that are different from our own does not mandate acquiescence or violation of

policy. We expect all written, e-mail, verbal, and otherwise communications to be conducted with a respectful tone and tenor, and in compliance with established protocols and the [ASU Code of Conduct \(https://eoss.asu.edu/dos/srr/codeofconduct\)](https://eoss.asu.edu/dos/srr/codeofconduct).

Classroom Disruption Protocol

New College is committed to maintaining a respectful and productive learning environment. Significant classroom disruption is behavior that materially interferes with instruction or with other students' ability to engage in the course, and that continues after a direct verbal warning from the instructor. This does not include appropriate academic discussion, peer interaction directed by the instructor, or brief pre-class conversation.

Progressive Response to Disruption

This policy follows a three-step process, with enforcement shared between instructors and New College administration:

1. Verbal Warning

If disruptive behavior continues after an initial warning, the instructor will meet with the student and formally notify them that the behavior has been cited.

1. Formal Citation

Continued disruption will require a meeting with the relevant School Director (or designee). The student will be informed that further disruption may result in a Student Code of Conduct violation and instructor-initiated course withdrawal.

1. Final Action

A subsequent significant disruption may result in the student being asked to leave the classroom immediately, referral to Student Rights and Responsibilities, and instructor-initiated withdrawal from the course.

Safety Exception

At any time, behavior that poses a risk to the safety of the class will be reported immediately to ASU Police. Classroom safety supersedes all procedural steps.

By remaining enrolled in this course, students are expected to comply with this policy and understand the consequences of repeated classroom disruption.

Title IX

It is a federal law that no person be excluded on the basis of sex from participation in, be denied benefits of, or be subjected to discrimination under any education program or activity. Both Title IX and university

policy make clear that sexual violence and harassment based on sex is prohibited. An individual who believes they have been subjected to sexual violence or harassed on the basis of sex can seek support, including counseling and academic support, from the University. If you or someone you know has been harassed on the basis of sex or sexually assaulted, you can find information and resources at [ASU's website for Sexual Violence Awareness, Prevention, and Response](https://sexualviolenceprevention.asu.edu/faqs)

(<https://sexualviolenceprevention.asu.edu/faqs>). As mandated reporters, faculty are obligated to report any information of which they become aware regarding alleged acts of sexual discrimination, including sexual violence and dating violence. [ASU Counseling Services \(https://eoss.asu.edu/counseling\)](https://eoss.asu.edu/counseling) are available if you wish to discuss any concerns confidentially and privately.

Withdrawals

Specifically, students should be aware that non-attendance will NOT automatically result in being dropped from the course. Therefore, if a student does not attend class during the first week or for any extended period of time during the semester, they should not presume that they are no longer registered. It is the student's responsibility to be aware of their registration status. Any withdrawal transaction must be completed by the deadline date in accordance to the appropriate session at the registrar's office. If not, you will still be officially enrolled and receive a grade based on your completed work. For additional information about ASU's withdrawal policy and the possible consequences of withdrawing from a class, contact [Registration Services \(https://students.asu.edu/registration\)](https://students.asu.edu/registration) or your academic counselor.

Table 1: Some Calendar Reminders –

Table 1: Some Calendar Reminders – Session C

	Session A	Session B	Session C
Session Start Date	5/18/2026	7/1/2026	5/18/2026
Session End Date	6/26/2026	8/11/2026	7/10/2026
Drop Deadline (No W)	5/22/2026	7/5/2026	5/22/2026
100% Tuition Refund Deadline	5/22/2026	7/5/2026	5/22/2026

Course Withdrawal Deadline	6/7/2026	7/21/2026	6/7/2026
Complete Session Withdrawal Deadline	6/26/2026	8/11/2026	7/10/2026
Memorial Day Observed	05/25/2026 – Classes Excused / University Closed		
Independence Day Observed	07/03/2026 – Classes Excused / University Closed		

ASU’s Full Academic Calendar (<https://registrar.asu.edu/academic-calendar#spring2024>)

*As part of a complete session withdrawal, a student must withdraw from all classes in that session. Beginning the first day of classes, undergraduate students are required to work with a Student Retention Coordinator to facilitate the withdrawal process. Please refer to the **ASU Registrar’s webpage How to Drop, Add, and Withdrawal** (<https://students.asu.edu/drop-add#comp%20wd>).
